SUBJECT: **PRIA Label Amendment for Raptor 5**  
**EPA Reg. No. 4091-22**

Dear Ms. Rivas,

On behalf of W.M. Barr & Company, Inc., enclosed is a label amendment for the above referenced product to add a non-food contact sanitization claim against *Escherichia coli*. Raptor 5 is a hard surface disinfectant (bactericide, virucide, and fungicide), a sanitizer (non-food contact surfaces, soft surfaces, and residual), and a mildew fungistat for both hard and fabric surfaces. This submission is for an amendment requiring data review to an end-use product, and thus qualifies for PRIA code A570 with a 4-month review period and PRIA fee of \$4,023. Proof of prepayment via [www.pay.gov](http://www.pay.gov) is enclosed in this submission.

Other label changes proposed include:

- Updated directions for use
- Addition and revision of marketing claims
- Updated fragrance claims
- Updated use sites
- Include addition of product logos and graphics
- Updated claim qualifiers

Revisions are **redlined** on the enclosed “marked-up” label. A clean label is also attached.

A complete list of administrative materials and studies can be found on the attached Transmittal.

Please contact me via phone (260.244.6270) or email ([therber@srconsultants.com](mailto:therber@srconsultants.com)) with any questions.

Sincerely,

Tony Herber  
Agent
